

Bolt Press & Hydraulic Die – *Low-Cost Pellet Preparation*

Bolt Press

Hydraulic Die

The PIKE Technologies Bolt Press and Hydraulic Die are low-cost tools for making KBr pellets for transmission FTIR analysis.

The press and die consist of a stainless steel barrel with two hardened and polished 13-mm rams. The barrels are equipped with a fitting which allows evacuation of air while the pellet is formed. For the Bolt Press, the pressure is applied to the sample by tightening the bolts against each other with standard 15/16" wrenches – included. For the Hydraulic Die the pressure is applied to the sample by placing it in a hydraulic press – up to 10,000 psi. Once a clear pellet is formed, the rams are removed and the sample is analyzed while still in the barrel (barrel is placed directly in the beam using the Press Holder with a standard 2" x 3" slide mount). Both accessories form a 13-mm pellet.

The PIKE Technologies Bolt Press and Hydraulic Die both include a holder.

Hand Press – *For Making Smaller Pellets*

The PIKE Technologies Hand Press is an ideal solution for laboratories that require only occasional preparation of KBr pellets and cannot justify the expense of a hydraulic press.

The Hand Press is an efficient, reliable and inexpensive tool which simplifies making small pellets. It consists of a long stainless steel barrel and movable stage controlled by a lever capable of applying high pressure to the KBr/powder mixture. The Hand Press comes complete with three standard die sets (7, 3 and 1 mm). The pellet preparation involves loading of the powdered sample into the die chamber, placement of the upper anvil in the press and application of hand pressure to the lever (this is sufficient to provide clear, high-quality KBr disks). The Die Collar with the formed pellet is removed from the press and in most cases it can be placed directly in the beam of the spectrometer for analysis. The Hand Press is equipped with a platen position dial for adjustment of the force applied to the die for reproducible sample preparation.
